

**Matthew Hill**

Risk Manager

Allina Health

**Summarize your experience in your career within health care risk management.**

I have worked in Quality and Risk Management in different capacities for over 12 years. The last 8 years of which have been dedicated to Risk Management. I also serve as President for the Minnesota chapter.

**How has your past leadership or management experience prepared you to serve in an ASHRM leadership role?**

In past roles I have been tasked with building or redefining risk management programs. First at a small health system with a Level 1 trauma center flagship hospital, I served as the only risk manager for the entire health system (2 hospitals, 24 clinics, and large EMS department). I also was tasked with creating a Risk program at an air medical program when I served as a VP there briefly. Finally, my role as president of the Minnesota chapter have all prepared me to serve confidently.

**Describe your involvement in any of the local Chapters.**

I am the President of the local Minnesota chapter. Prior to that, I served as a Member at Large and the Education Committee Chair. I have worked with ASHRM leaders in supporting local chapter development and maturation, and have networked with several ASHRM leaders at the past two Annual Conferences. Provide a list of previous volunteer experience within ASHRM (committees/task forces, faculty, elected offices, publications, etc) I have participated in the Chapter Development initiatives within ASHRM, and have recently agreed to present an ASHRM webinar on Navigating AI and technology. Page: ASHRM Advisory Board Applicant Form.

**Where do you see the future for ASHRM?**

I see ASHRM maintaining a foundation for support for the profession by continuing to be the premier professional resource for members, new and old alike. The transition over the past decade into a focus on an enterprise mindset has been influential on how risk management is viewed in a number of healthcare organizations. I envision ASHRM building on this to be a resource for primary risk management roles, along with encouraging interest from those who risk management may be a secondary function.

**How have you demonstrated leadership within the health care industry as it pertains to risk management (i.e., risk financing, claims management, legal or regulatory, ERM, etc)**

I have been active in managing the local ASHRM chapter for Minnesota, and have also been involved in several training and educational presentations to several external stakeholders on healthcare risk topics. I have managed several high risk incidents and claims in past roles. In addition, I have been active in supporting and at times leading regulatory surveys related to complaint investigations.
